PROJECTS

RING MODE

- Ring Mode is an android application which is developed using ADT. It used for changing phone modes from silent to ring or vice-versa, just by sending a single sms.

INTRUDER DOOR ALERT SYSTEM

- It is an IOT based project using Raspberry Pi-3B. It identifies the intruder's presence, capture and transfers the video through email automatically to home owner to recognize the intruders.

WEATHER WEB APP

- It is web based application developed in Vanilla JS. The data has been fetched from openweathermap.org to forecast the weather of any location.
